## LOCALIZADOR DE CABOS

Ref: 01201ST201

### Senter ST201 Cable Tracker

#### Overview

ST201 cable tracker is used for RJ11 cable installation and tracking.

This is designed to identify and track cables or wires within a group without damaging the insulation. In telephone line, it can identify some states in the line. The ST201 cable tracker has a sender and a receiver included. Owning this instrument, it is more convenient to install, debug and maintain telephone line.

## Features

Analyze continuity of the cables or wires.

Track the cables or wires, and diagnose the break point.

Receive the tone signal on the cables or wires (telephone line)

Identify the state in the working telephone line (clear, ring, busy)

Send a solid tone signal or dual alternating tone to the object cables or wires.

## Functions

Judge continuity of the cables or wires.

Track the cables or wires, and diagnose the break point.

Receive the tone signal on the cables or wires (telephone line)

Identify the state in the working telephone line (clear, ring, busy)

Send a signal solid tone or dual alternating tone to the object cables or wires.

## Structure
