Senter ST206 Cable Tracker

ST206 Cable Tracker can scan line, test line, voltage polarity detection and short circuit indication function. It is an assistant of line installation and maintenance engineer. This product is applied to the communication lines and the ordinary family wiring. It can improve the wiring efficiency of engineers and also can improve the line working progress.

Features

1. Scan line function: can quickly find the needed line among many disordered lines.
2. Test cable type: network cable, twisted pair cable, telephone line, USB cable, coaxial cable.
3. When switchboard is with weak electricity, ST206 can also check the line.
4. Test line function: easy to accurately test the RJ45 line sequence.
5. You can use earphone to scan line under noisy environment.
6. Flashlight function on receiver is convenient to scan in the dark environment.
7. Line status test: ST206 can determine the open or short circuit status.

Structure

- 1 - Status indicator
- 2 - Function switchover button
- 3 - Voltage test "+" polarity indicator
- 4 - Voltage test "-" polarity indicator
- 5 - Function switchover touch button
- 6 - Probe
- 7 - Scanning indicator
- 8 - Scanning button
- 9 - Testing indicator of receiver
- 10 - Earphone socket
- 11 - Flashlight button
- 12 - Volume adjust button
- 13 - RJ45 socket of receiver
- 14 - Flashlight
- 15 - RJ45 socket of emitter

Specifications

Power: 9V battery (included) **Receiver Size:** 26*36*177mm **Emitter Size:** 24*42*135mm
Distance of signal transmission: No less than 3km **DC Voltage:** No more than 48V
